

NAGUL K.S

SOFTWARE ENGINEER | IoT ENGINEER

Salem, Tamil Nadu | +91 9843680094 | technagul01@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with a B.E. in Computer Science and Engineering and hands-on experience in web development, IoT, cloud integration, and software projects. Skilled in Java, Python, JavaScript, React.js, PHP, MySQL, AWS, ThingSpeak, Linux, and embedded systems. Strong foundation in software development, system troubleshooting, cloud-connected IoT solutions, and problem solving.

TECHNICAL SKILLS

- Programming Languages: Java, Python, C, Embedded C
- Web Development: HTML, CSS, Bootstrap, JavaScript, React.js, PHP
- Database: MySQL, Oracle
- IoT and Cloud: AWS, ThingSpeak, IoT Hardware Integration, Cloud Integration
- AI and Machine Learning: Machine Learning, MATLAB
- Tools and Operating Systems: Linux, COOJA

PROFESSIONAL EXPERIENCE

Web Developer | Optimus Technocrates (India) Pvt. Ltd. | Apr 2025 – Sep 2025

- Developed responsive web applications for client-based projects.
- Implemented web application requirements using frontend and backend technologies.
- Collaborated with the development team on application development and project delivery.
- Supported application testing, troubleshooting, and implementation activities.

IoT Developer Intern | Magnertia TBI@KEC | Apr 2023 – Dec 2023

- Integrated IoT hardware with AWS and ThingSpeak for real-time cloud monitoring.
- Worked on IoT solutions involving hardware, software, and cloud integration.
- Supported real-time data monitoring through cloud-connected IoT systems.
- Collaborated with the development team to improve IoT system connectivity and prototype development.

EDUCATION

B.E. Computer Science and Engineering

Kongu Engineering College, Perundurai | 2020 – 2024 | CGPA: 8.21

AISSE (Class XII) – Mathematics and Computer Science

Bharathiyar Hi-Tech International Senior Secondary School CBSE, Attur | 2020 | 71%

AISSE (Class X)

Bharathiyar Hi-Tech International School CBSE, Attur | 2018 | 68%

PROJECTS

- **Cotton Boll Recognition for Robotic Harvesting Using CNN U-Net**- Developed a deep learning model using CNN and U-Net to detect and classify cotton bolls for agricultural automation and robotic harvesting.
- **Thailand Tourism Sentiment Analysis**- Conducted sentiment analysis on Twitter data to evaluate public perception and tourism recovery trends following the COVID-19 pandemic.
- **Sree Senthoo Tiles & Ceramics**- Designed and developed a PHP-based platform for product management and customer handling.

Single Portal for Land Survey- Proposed a centralized digital solution for land record management as part of Ideathon 2022 at Kongu Engineering College.

PUBLICATIONS

- **Cotton Boll Detection Using Deep Learning** – Published in IEEE Xplore and a Scopus-indexed journal, Jan 2024.
- **Exploring the Impact of COVID-19 on Thailand's Tourism Industry: A Sentiment Analysis Approach Using Twitter Data** – Published in IEEE Xplore and a Scopus-indexed journal, Dec 2024.

LEADERSHIP AND ACTIVITIES

- Joint Secretary, CSE Association | 2023 – 2024
- Software Coordinator, TBI@KEC | 2022 – 2023
- Presented papers on IoT and Cybersecurity at national-level symposiums.
- Volunteer, NSS | 2022 – 2023
